ANTI SPAM POLICY

In the context of automated messaging, spam means uncalled-for or unrequested, bulk or indiscriminate emails, usually sent for an advertisement purpose or malicious purposes. The Future Trade has a zero-tolerance and rigid adherence when it comes to spam policy.

AN EFFICIENT COMPUTERIZED SPAM FILTERING SYSTEM.

The Future Trade's sophisticated and enhanced messaging systems automatically scan any incoming messages as well as other emails, and filter-out emails that are considered spam with respect to our establish guide of terms and conditions.

DIFFERENT ISSUES WITH SPAM FILTERING

No message filtering system is absolutely dependable which is why from time to time legitimate emails will be filtered out by The Future Trade's platforms. In case you believe this has happened to the email which was sent by you, kindly inform the message receiver by an alternative means and make him know the accurateness of it.

You can actually decrease the risk of an email being caught by the spam filters by sending the message in plain text (i.e. no HTML), taking away any attachments, and making sure that your emails are scanned for trojans before dispatch and avoiding the use of means of language which are in relation to our spam policy.
